

- Since 1987 -

ASI is a 34 year old, privately held, company focusing on long-term investments in technology companies that deliver profound and positive engineering solutions for: healthcare, manufacturing, workflow optimization, logistics, and education.

Founded in 2013, Advanced Solutions Life Sciences enables 3D biology through an integrated hardware, software and life sciences platform. BioAssemblyBot® is a robot learning to build human tissues and organs along with automating a variety of 3D biology science operations. BioApp™ is a software application that automates the processing steps to create and build 3D biology and models. Angiomics® is a novel vascularization product that creates living human blood vessels and adapts to 3D tissue/cell environments.
